THE FARMER NURSERY

E. A. FARMER, PROP.

LINDEN HILLS STA., ROUTE 2

LOCATED AT FRANCE AVENUE AND 62D STREET

TELEPHONE: WALNUT 2755

MINNEAPOLIS, - MINN.

TO OUR FRIENDS AND CUSTOMERS:

The season of 1923 was one of the best we ever had for business.

We sold more plants and Bulbs to a larger number of customers than ever before. This tends to show that our plants and Bulbs are giving satisfaction and that our business methods are correct.

We wish to greet all of our old customers, who have so loyally stood by us through two decades and wish them with all new ones a Happy and Prosperous year.

LOCATION

We are located just outside the city limits at France Ave. So. and 62nd St.

READ THIS BEFORE ORDERING

Prices given are for stock carefully packed and delivered F. O. B. Minneapolis.

Remit by money order, registered letter, draft, express or personal check. Currency at your own risk.

Terms, cash with the order, which will be filled and shipped as soon as suitable to plant.

Guarantee. We exercise the greatest care to have our stock true to name and carefully labeled. Should any mistakes occur, we are willing to correct them, but will not be responsible for any more than the original cost or replace the goods.

All orders accepted on condition that they shall be void, should injury befall our stock from fire or other causes over which we have no control.

Inspection completed September 11, 1923.

MINNESOTA STATE DEPARTMENT OF AGRICULTURE

OFFICE OF STATE ENTOMOLOGIST

No. 1634

St. Paul, Minn., October 17, 1923

CERTIFICATE OF NURSERY INSPECTION

This is to certify that in accordance with Sec. 1, Chapter 206, Session Laws of 1913, the nursery stock and premises of **The Farmer Nursery** of Minneapolis, Minn.; E. A. Farmer, Proprietor, have been carefully examined by a duly authorized inspector and found apparently free from dangerously injurious insects and contagious plant diseases.

This certificate is good until November 1, 1924, unless revoked, and covers only stock actually on the premises when examined.

N. J. HOLMBERG,
Commissioner.

A. G. RUGGLES,
State Entomologist.

STRAWBERRIES

Progressive (Everbearing)

Seems to be the leading strawberry for home use. They can be grown any where other varieties succeed, any good garden soil or field that will grow corn or other crops, will grow strawberries.

Everbearing plants should be set early in the spring. Hoed, cultivated and fertilized same as other strawberry plants.

Progressive plants set in the spring not only produce an immense crop of extra nice berries the year they are planted but the runner plants bear fruit soon as set. Progressive yields a crop of fruit the first year that is truly wonderful.

Blossoms should be kept picked off till the middle of July for best results.

They are early and a heavy bearer and continue bearing until frost or till the ground freezes.

The berries are of medium size, highly colored red to the core; quality of fruit ranks with the best. Our plants are fine.

Prepaid, 25 for 50c; \$1.60 per 100; for less than 500.

Not prepaid, \$12.00 per 1,000; 500 at thousand rates.

Senator Dunlap

Senator Dunlap is probably the most widely known spring-bearing variety grown throughout the country. Does well in any type of soil, and in most any locality. They have long fibrous roots which make them good drouth resisters. Berries good size, bright rich red clear through and of fine quality.

Prepaid, 25 for 35c; 50 for 50c; 100 for 90c.

Not prepaid 1,000 for \$5.50; 500 at 1,000 rates.

RASPBERRIES

King. Many of our leading fruit growers consider this one of the best of the early red raspberries. Berries large and attractive, bright red in color and of good flavor. Ripens with the earliest and is firm enough to ship well. The canes are healthy and productive. Very hardy.

50c dozen; \$2.00 per 100.

Cumberland. (Black.) The largest of all black-caps. A healthful vigorous grower, throwing up strong stocky, well branched canes which produce large crops of fine berries. Fruit firm and large.

50c dozen; \$2.50 per 100.

Plum Farmer. Ripens its fruit very early and always brings the top price. Heavy producer, one of the leading blacks.

50c dozen; 2.50 per 100

If wanted prepaid, add 50c per 100 for Raspberry, Blackberry, Gooseberry, Grapes, Currants and Asparagus Roots.

All blackberries and black Raspberries should be laid down and covered with dirt (early) just before the ground freezes up when the winter is setting in,

Latham. (Minn. No. 4.) Probably the most valuable red Raspberry ever introduced. Plants vigorous, canes tall nearly thornless and reddish in color, and hardy. Berries large, rich red, firm; holds up well under shipment and ripens evenly. Season about a week later than King. Valuable commercial variety.

Doz., \$1.00; 50 for \$2.25; 100 for \$4.00.

FRUITS INTRODUCED BY THE UNIVERSITY OF MINNESOTA FRUIT-BREEDING FARM

DESCRIPTION OF NEW VARIETIES OF

PLUMS

Elliott. Tree vigorous, very hardy, upright spreading growth; fruit medium to large, round-oval, red; flesh firm, juicy; quality good; stone small, cling; season late, about September first. Promising as a market variety because of its productiveness and regular bearing.

3 to 4 feet 75c each

Red Wing. Tree is moderately vigorous, upright spreading, quite hardy; fruit very large, yellow overlaid with bright red; flesh moderately juicy, sweet; quality very good; stone medium to large in size, entirely free; mid-season. An excellent variety for home use and an attractive market plum.

4 to 5 feet 85c each

Tonka. Tree of medium size and vigor, of upright spreading growth, hardy; fruit roundish, large, dark red; flesh firm, sweet; quality good; stone very small, free or nearly free at maturity; early mid-season especially recommended for home and market because of its extremely high productivity, its good quality and ability to stand up well in storage or transit. Trees of this variety sometimes produce a knotted growth on the trunk which, taken together with its heavy bearing habit, will probably make it shorter-lived than some other varieties.

4 to 5 feet 85c each

Monitor. Tree medium in size but vigorous, produces a compact, rounded, well-shaped head, hardy and productive; fruit is large, roundish, well colored, with dark, dull red; flesh firm, moderately juicy, sweet; quality fair to good; stone medium in size, cling; late mid-season. Very promising as a market plum.

3 to 4 feet 75c each

Underwood. Tree extremely vigorous, large size, of spreading growth, forming a round head, very hardy and very productive; fruit is large, roundish-oval, attractive red in color; flesh juicy, fairly firm, hangs well to the tree, ripens very early and continues over a long season; stone is small, cling; quality excellent.

4 to 5 feet 85c each

Goldenrod. Tree is tall, vigorous, upright in form, hardy, productive; fruit medium to large in size, round, clear yellow; flesh firm, moderately juicy, moderately sweet; fair to good in quality, stone medium in size, cling; season last of August. Very promising as a market plum.

3 to 4 feet 75c each

PLUMS—

Desoto 5 to 6 feet,

Surprise 5 to 6 feet,

Forset Garden 5 to 6 feet, 85c each.

CHERRIES

Homer. Is one of the few varieties which succeed in Minnesota. Fruit is of good size and of dark red color. Perfectly hardy

4 to 5 feet 75c each.

Zumbra. Tree very hardy, vigorous, round head, small size; fruit is borne in thick clusters along the limbs, small to medium in size, dark purplish black, round; flesh crisp, juicy, crackling; stone small, cherry like, free; season last of August. This variety may be used as a substitute for cherries and because of its early bearing and enormously productive habit is of value for both home and commercial purposes.

4 to 6 feet, \$1.25 each.

APPLES AND CRABS

Duchess

5 to 6 feet
